

SITE MONITORING RECORD - GOOMIG AND KNOX

SITE REFERENCE

VEG SITE 1

DATUM

DATE AND TIME

12/6/21

GPS COORDINATES

15.56458

128.51099

SITE DESCRIPTION:
Vegetation type,
condition, weed
presence, erosion

Plenty of vegetation
Mainly weeds + trees some grass.
no erosion
mint weed

VEGETATION	RATING	% of site	RATING DESCRIPTION
Excellent	1		Nearly all plants present are desirable species and ground cover is optimal for the site.
Good	2	80	Most plants present are desirable, with intermediate perennials and annual types increasing in frequency. A few undesirable species may be present.
Fair	3	20	Intermediate value species usually predominate; desirable and undesirable species occupy similar proportions of the available ground space. Small patches of bare ground may be present.
Poor	4		Undesirable and intermediate species predominate in the stand; desirable species are very infrequent and may occur only in small patches. The overall stand may be sparse or patchy with frequent areas of bare ground.
Very Poor	5		Undesirable species or bare ground predominates; there are few intermediate species and virtually no desirable species in the stand.
OVERALL RATING	3		

SITE AND SOIL
DESCRIPTION: Landform;
aspect; time since last
fire; disturbances; any
correlation between
vegetation and landform
features.

Flat country with no fire been through
